

MHD

MULTI HOUSING DEPOT
DELIVERING A BETTER WAY TO LIVE

CASE STUDY: MCFARLAND WOODS SALON

PROJECT OVERVIEW

MHD was brought in to support a salon space that needed to feel modern, warm, and intentionally designed while still delivering the storage and usability a high-traffic environment demands. The cabinetry had to look refined from every angle, work within a bright, open layout, and support both stylist stations and a secondary coffee bar area.

AT A GLANCE

Client: McFarland Woods

Location: Glen Echo, MD

Application: Hair salon

Door Style: Skyline

Color: Noce

Drawer System: Nova Pro

WHAT MHD DELIVERED

- Wall-hung vanity stations that create a lighter, more open look while keeping everyday storage close at hand.
- Coffee bar cabinetry designed to blend into the overall space while adding practical organization.
- Floating shelves for additional storage and display without making the room feel heavy or crowded.
- Soft-close cabinet doors to make the space feel quieter, smoother, and more finished in daily use.
- White cabinet interiors brighten storage areas and create a crisp contrast against the natural exterior finish.
- Coffee bar with slide-out wastebasket with a false-panel top for a cleaner look and better day-to-day function.

THE RESULT

The finished salon and coffee bar strike the balance this project called for: clean lines, practical storage, and a custom look that feels right at home in a design-forward setting. It is a strong example of how the right cabinetry details can help define specialty spaces beyond the kitchen - especially when appearance and function need to work together.
